ABOUT THE CONFERENCE

Cosmetology studies the underlying science behind the effect of natural and synthetic compounds on the human skin, along with its synthesis, R&D, and large-scale production. In recent times, the gradual increase in environmental hazards has kept on posing several challenges, such as premature aging, infection, inflammation, etc., that hinder maintaining healthy skin. The CARWC-2025: Cosmetology Aging and Rejuvenation World conference aims to share various aspects of cosmetic underpinnings globally. The conference promises to seek participation from most developing nations and is scheduled in France from July 21-23, 2025.

The conference aims to foster knowledge among different stakeholders, such as clinicians, industry experts, researchers, young scientists, dermatologists, surgeons, and regulatory bodies, about the current technologies and advancements in the field of skin science and the challenges faced in plastic surgery. This conference provides a forum to discuss and seek futuristic solutions for the current challenges and their feasibility. The discussions will promote a novel perspective, better understanding, and future directions in dealing with the existing treatment problems on a global scale.

Participants will be introduced to advanced cosmetic technologies, panel discussions, direct surgical workshop sessions, engaging brainstorming sessions, and exciting poster/oral presentations from researchers of interdisciplinary domains. The conference offers a great platform for the participants to network and build new research collaborations.

This conference features several exciting and informative scientific sessions, including Cosmetic Science, Dermatology and Skin Science, Genetic Skin Disorders & Diseases, Cosmetic Surgery, Rhinoplasty & Otoplasty, Reconstructive and Aesthetic Surgery, Trichology and Hair Transplant, Cosmetic Medicine, Nanotechnology in Cosmetics, Biotech Beauty, Healthy Aging and Longevity, Geriatric Medicine, Ageing and Rejuvenation, Anti-Aging Strategies and Drugs, Skin Rejuvenation, Mechanisms of Aging, and Nutrition and Diet in Geriatric Care.

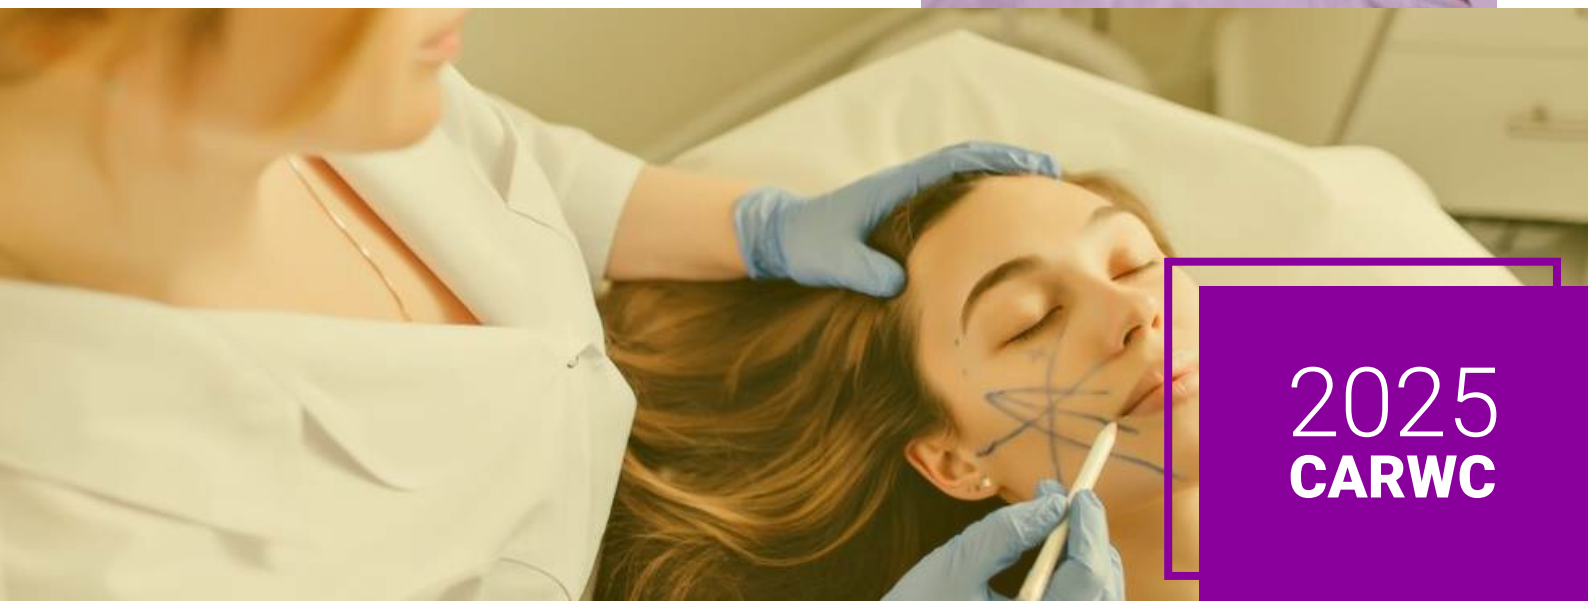

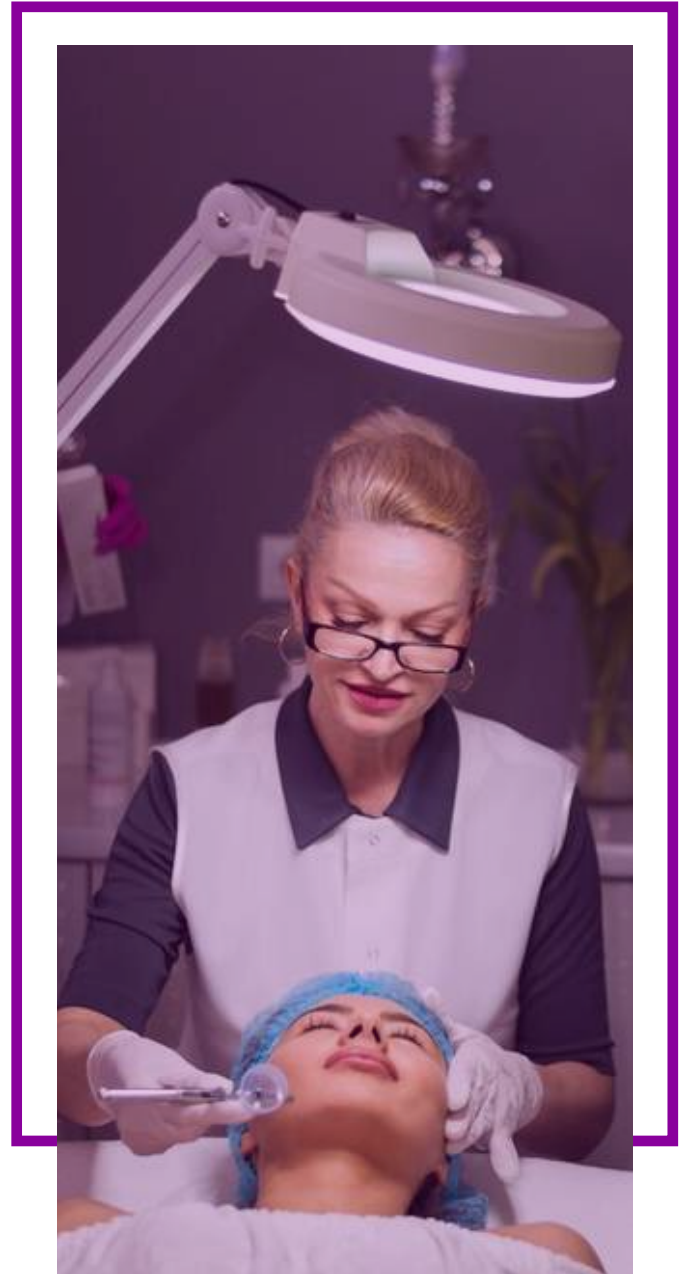

The conference calls forth researchers, academicians, clinicians, and industry partners across the globe to be a part of this exciting event, share their valuable work, learn about the latest technology updates, get abreast with the latest research and innovations, and make it a grand success.
